

## **THE OLIVER GROUP ANNOUNCES EXPANDED MEDIA STORAGE SOLUTIONS**

*The Oliver Group's increased growth in Litigation Support and Compliance Business leads to additional expansion*

### **PAWCATUCK, CT- SEPTEMBER 2007**

The Oliver Group (TOG), a leading provider of data collection, media restoration and data conversion services, has announced the implementation and utilization of their expanded, controlled, secure media vault and storage services.

Through The Oliver Group's media storage solutions, efficient and streamlined Chain of Custody procedures allows for the storage of tape and hard drive media for secure monthly control related to Compliance, Disaster Recovery, Litigation and Off-Site Storage. This vaulted solution has allowed The Oliver Group's clients to be free from the burden of attempting the secure storage of media while trying to maintain day to day operations.

"Do you have a handle on your data? Is your media secure?" asks Dean Felicetti, a Partner in The Oliver Group. "With regulations, compliance and trends in data storage and production changing, it is imperative to have complete control of your security and storage policies".

The Oliver Group's secure media storage solutions allows Corporations, Law Firms, and Electronic Discovery Companies the ability to securely store, locate and identify which particular pieces of media are required for discovery, compliance, or ingestion into email archiving/document management systems. An example of results yielded from the Chain of Custody processes related to the secure media vault include, but aren't limited to; key custodian logging, write protection, backup dates, source technologies, email versus electronic documents all of which are ascertained from each piece of media.

### **ABOUT THE OLIVER GROUP**

The Oliver Group is an independently owned, nationally recognized industry leader in litigation support and data recovery. The Oliver Group's proprietary approach to media restoration lends itself to high volume processing, data integrity, flexibility across platforms and output formats, and data security. Since 1997, TOG has handled data collection, data restoration and conversion for some of the most significant litigation cases across the country, consistently enhancing its reputation for the efficient and accurate management of large scale collection, restoration and conversion projects for pre-process litigation support.
